BLNK MEDICAL TECHNOLOGIES, LLC Booth 303

3121 St. Paul Street, Ste. 29, Baltimore, MD 21218

Blnk Medical Technologies, LLC is a decision support informatics company focused on the critical point-of-care. Our business is at the intersection of information science, computer science, and health care. We have developed proprietary decision support software and tools to optimize the retrieval and use of vital laboratory information at the critical point-of-care. Laboratory results are essential to diagnosing and managing critically ill patients with “some 70-80% of medical decisions based on laboratory testing results.” Blnk provides a comprehensive turn-key approach which includes real-time display of vital laboratory results; organized, trended, and formatted on a touch screen monitor at the patients bedside. Critical lab results are also communicated immediately to the targeted caregiver through Blnk's iPhone application and helps hospitals comply with the Joint Commission's 2011 Laboratory Patient Safety Accreditation Goals (NPSG.02.03.01)

GTC BIOTHERAPEUTIC..... Booth 201

175 Crossing Blvd, Framingham, MA 01702

GTC Biotherapeutics develops, produces, and commercializes therapeutic proteins based upon its proprietary transgenic production platform. ATryn®, the Company's recombinant form of human antithrombin, is the first and only transgenically produced protein approved by the US FDA. ATryn® has also been approved by the European Medicines Agency. GTC recently concluded two out-licensing partnerships for the registration and commercialization of ATryn® ex-US. GTC is developing additional recombinant forms of therapeutic proteins normally found in human blood plasma as well as monoclonal antibodies. For example, the Company is preparing to initiate phase 2 clinical studies in hemophilia with a recombinant Factor VIIa product, and has a novel 'bio-better' monoclonal antibody in pre-clinical development. GTC's transgenic production platform is particularly well suited to enable cost effective production and unparalleled scale-up flexibility of almost any therapeutic protein. Additional information is available at [www://gtc-bio.com](http://www.gtc-bio.com).

GTC is wholly owned by LFB Biotechnologies, a division of LFB, S.A. (www://lfb.fr) in Les Ulis, France. LFB is the leader in France in the field of plasma-derived medicinal products, is the 6th largest company in the world in the plasma-derived products' market. LFB is currently ranked as the 3rd largest supplier of medicines to the French hospital market, with a total of 19 products.

Recently, LFB has emerged as a leader in the development of therapeutic monoclonal antibodies and a new generation of recombinant plasma proteins based on innovative biotechnology.
